IRS orders immediate stop to new Employee Retention Credit processing

The IRS is working diligently to crack down on fraud and questionable claims to protect taxpayers from scams. Amid rising concerns about a flood of improper Employee Retention Credit claims, the Internal Revenue Service today announced an immediate moratorium through at least the end of the year on processing new claims for the pandemic-era relief program to protect honest small business owners from scams.

IRS Commissioner Danny Werfel ordered the immediate moratorium, beginning today, to run through at least Dec. 31 following growing concerns inside the tax agency, from tax professionals as well as media reports that a substantial share of new claims from the aging program are ineligible and increasingly putting businesses at financial risk by being pressured and scammed by aggressive promoters and marketing.

The IRS continues to work previously filed Employee Retention Credit (ERC) claims received prior to the moratorium but renewed a reminder that increased fraud concerns means processing times will be longer. On July 26, the agency announced it was increasingly shifting its focus to review these claims for compliance concerns, including intensifying audit work and criminal investigations on promoters and businesses filing dubious claims. The IRS announced today that hundreds of criminal cases are being worked, and thousands of ERC claims have been referred for audit.

The IRS emphasizes that payouts for these claims will continue during the moratorium period but at a slower pace due to the detailed compliance reviews. With the stricter compliance reviews in place during this period, existing ERC claims will go from a standard processing goal of 90 days to 180 days – and much longer if the claim faces further review or audit. The IRS may also seek additional documentation from the taxpayer to ensure it is a legitimate claim.

As part of the wider compliance effort, the IRS is working with the Justice Department to address fraud in the ERC program as well as promoters who have been ignoring the rules and pushing businesses to apply.

The IRS has trained auditors examining ERC claims posing the greatest risk, and the IRS Criminal Investigation division is actively working to identify fraud and promoters of fraudulent claims for potential referral for prosecution to the Justice Department.

IRS Criminal Investigation (IRS-CI) investigates a variety of COVID fraud allegations ranging from fraudulently obtained employee refund tax credits to falsified Paycheck Protection Program loans. To date, IRS-CI has uncovered suspected pandemic fraud totaling more than \$8 billion. As of July 31, 2023, IRS-CI has initiated 252 investigations involving over \$2.8 billion of potentially fraudulent Employee Retention Credit claims. Of those, fifteen of the 252 investigations have resulted in federal charges. Of the 15 federally charged cases, so far six matters have resulted in convictions, four of those cases have reached the sentencing phase with the average sentence being 21 months.

Criminal Investigation's work is in addition to ERC audits that have started. The IRS has already referred thousands of ERC cases for audit.

Practical Uplifting Horoscope Guidance You and Our Current Full Moon

Horoscopes in History

In 1929 the world was suffering from a deep depression. My most vivid and chilling sense of this time (as I was not even yet born) comes from seeing photos of people standing in long breadlines waiting to get even some small amount of food. It was during this time that the newspaper media invented daily horoscopes. The marketing strategy was that one nickel would buy a little good news for every member of a family. It worked. Thus, the popularity of profoundly over simplified Sun Sign Astrology was born. To this day daily horoscopes remain popular.

Horoscopes and The Moon

The Moon is a bit of a cosmic anomaly. It orbits around the earth not the Sun. It consistently completes an orbit every 29.5 days twelve (and sometimes thirteen) times a year. It is very visible to all and its cyclical nature is constant. It is arguably a heavenly body that receives more attention than the other many, also useful to understand but more complicated, elements of the zodiac.

The Full Moon is Conjunct (joined with) the Part of Fortune

Currently, in Southern Florida we have the delightfully lucky influence of the astrological point known as the Part of Fortune being right up close and personal to today's Full Moon. The Part of Fortune is a mathematical calculation of a point in the sky determined by adding up distances between and among 3 planets or points. It is physical location dependent.

Thus, nicely, this fortunate point currently applies to people located in Southern Florida. The concept of astrological Arabic "Parts" was born during times when star gazing was the dominant approach to understanding how life, liberty and the pursuit of happiness worked. There were times in ancient history when there was a "part" related to almost every occurrence in life (a part of giving birth, getting married etc., etc.). In modern Western Astrology the only remaining Part in the astrological palette is the Part of Fortune. No doubt you agree, this makes sense with our overriding values of caring about money and well-being. Our literal fortunes and what we consider to be fortunate are, of course, both, very important to us.

Full Moons shed light and, thus, now is an ideal time to be enLIGHTened about ways we are blessed to be fortunate. It is an excellent time to focus on gratitude. This phenomenon varies by Sun Sign as described below. See the following to know the area of your life where the expression of gratitude will be best and most favorable. (Note: If you happen to know the sign your birth chart Ascendent, it also applies and you are encouraged to read and follow both. Need help with this? Contact me at Hattie@hattieparker.com)
