*Abraham-Hicks*

This past week, a friend of mine recommended that I listen to podcasts/YouTube videos by Abraham Hicks. I have been familiar with Abraham Hicks but had not listened to her in several years. I put her name in YouTube search and the perfect message for what I needed to hear that day popped up. I ended up listening to her message 3 times on my evening and morning walks in a 24 hour period.

Yoga Shala in Jupiter  
<https://www.kulayogashala.com/shcedule>

**BOOK NOW**

The root chakra is located at the base of our spine associated with the regulation of energy connected with instinct, survival and safety. This primal chakra is often the most blocked and constricted energy fields in our bodies. Upon examination we may find ourselves struggling with our self-esteem and a general sense of lack in all things including safety, trust, control, money and a sense of belonging. Deficiencies and blockages of the root chakra may lead to feelings of anxiety, panic and even fear that can disrupt the flow of life.

Join us for a journey through these layers to the very center of your 'home' in the root chakra. Experience meeting yourself, your whole self, with love and compassion. By doing so, you can begin to find a stable source of safety and security within your own body leading to groundedness, patience, and trust. Connect to your authenticity and the inherent wholeness that is waiting to be seen, felt, expressed, and shared.

This will be a multilayered experience opening with meditation and mantra, continuing with Organic Vinyasa, Yin accompanied by sound bath, and closing with yoga nidra and an opportunity to share your experience with others.

## Pluto, Fate, and the 2023 Financial Outlook

### The Cosmic Perspective: Long Term

As we move into the second quarter of 2023, there is a planetary alignment that is having a challenging impact on careers and businesses. Pluto, the planet associated with power, transformation, and upheaval, in late March left Capricorn and entered the early degrees the zodiac sign of Aquarius. On June 11 it will move from Aquarius and back into Capricorn until early 2024 and then repeat this pattern in 2024 and moving forward from 2025 onward it will remain in Aquarius for the next 18 years. Aquarius is related to inventions and revolutions. We can expect that in the coming twenty-year period in human history there will be significant game changes both collectively and individually.

### The Comic Perspective for 2023

For the next two and a half months (thus, the bulk of 2nd quarter) Pluto will be in Aquarius and then it will return to Capricorn until early 2024 (thus, encompassing the 3rd and 4th Quarter). During this time Pluto will be engaged in a challenging energetic dance with the Nodes of the Moon. The Nodes in astrology relate to fate. So then, the next obvious question becomes: What does this mean for us as individuals?

Let us start by defining the energies of the signs that are involved: Pluto will be in Aquarius and Capricorn. Aquarius is about inventions, revolutions, and freedom of thought. Capricorn is about order, big business and government and tradition (the opposite of freedom of thought). Though very different in intent, both of these signs have in common that they tend to be cold and matter of fact about the need to do what is needed to make "things" work. The Nodes will be in Taurus and Scorpio. Taurus is the sign of the stubborn bull and Scorpio is the sign of the feisty scorpion. The planet, Pluto, and the astrological points (the Nodes) are going to be in kickass mode. Thus, as a word to the wise, I recommend you anticipate we are headed for a season when, if you are to flourish, you most likely will be faced with making forced changes and will probably be required to make some seriously tough choices.

# Cosmic Crypto Mojo

From our current vantage point there is a bright spot in all this about which to take note. As highlighted Aquarius is about freedom to thought. You can use the next three months, while Pluto is in Aquarius, to engage in personal growth, brainstorming, mind mapping, vision boarding and being creative in your thinking about your personal and professional lives. The Nodes are two points that are opposite each other. They represent our collective destiny (AKA as fate). When Pluto, the planet of transformation, “squares” the Nodes (90 degrees in between them) it means Pluto, the planet of power is caught like a pickle in the middle. A square aspect is a challenging aspect. Money and the economy are power related issues. Among the issues bank failures and concerns about the debt ceiling controversy are causing tensions concerning money and the economy. This planetary square, in addition to causing stress, can also motivate action for making constructive changes.

## In Conclusion: A Creative Imagination Exercise

Think of this 2023 2nd Quarter with Pluto in Aquarius as a movie preview for the coming years of change. Close your eyes. Imagine a big screen in front of you. Invite your imagination to show you foresight into the future. Take note of what you see.

(We sincerely invite you to share your visions so we can share them to support and help everyone in this community.)
