- VENUS + MARS AND YOUR SUN SIGN - WHAT TO EXPECT THIS COMING MONTH

Former Secret Service agent, Evy Poumpouras shares lessons learned from protecting presidents, as well insights and skills from the oldest and most elite security force in the world to help you prepare for stressful situations, instantly read people, influence how you are perceived, and live a more fearless life.

Becoming Bulletproof means transforming yourself into a stronger, more confident, and more powerful person. Evy Poumpouras—former Secret Service agent to three presidents and one of only five women to receive the Medal of Valor—demonstrates how we can overcome our everyday fears, have difficult conversations, know who to trust and who might not have our best interests at heart, influence situations, and prepare for the unexpected. When you have become bulletproof, you are your best, most courageous, and most powerful version of you. Poumpouras shows us that ultimately true strength is found in the mind, not the body.

Courage involves facing our fears, but it is also about resilience, grit, and having a built-in BS detector and knowing how to use it. In Becoming Bulletproof, Poumpouras demonstrates how to heighten our natural instincts to employ all these qualities and move from fear to fearlessness.

FEARLESS Fear + Less

Fearlessness is neither magic nor absolute. It is an attitude born of commitment and utter determination that motivates you to dance with your fears. One step forward, one step back, stand up for yourself and let your voice be heard, grow a little stronger, confront instead of avoiding your fears, take a courageous stand or accept responsibility, and you'll grow more competent and a little more fearless in the face of life's challenges.

Get Your Cosmic Mojo On Venus (The Peacemaker) Talks to Mars (The Warrior), This Communication Between Opposites Brings Opportunities for Growth

A Powerful Trend for a Month

For the next month Venus and Mars will be in very direct and immediate dialogue with each other. They are "conjoined" and this means they are very close to each other. They are hanging out in the middle range of Capricorn, a powerful energy that moves us to be serious about creating effective results. Venus is the epitome of female energy focused on wanting harmony and cooperation. Mars is the epitome of masculine energy wanting action. Together they can support you in achieving balanced solutions to even vexing issues.

Worldwide Consequences: Peace/War

The presence of troops surrounding the Ukraine is unsettling. Putin is acting on what seems to be a huge agenda to be given serious attention. Currently he has captured the gaze of people worldwide. The dialogue is a daily juggling of peace (Venus), war (Mars), peace (Venus), war (Mars). Hopefully the month-long extended time these two planets are conjoined will contribute to creating the time and space for communication that could result in even avoidance of war. Alternatively, we may we contribute to the greater good by putting energy into seeing our negotiators as having the cosmic wisdom, to help mitigate negative consequences.

Cosmic Crypto Mojo

On Sunday February 20, 2022 Pluto the planet of power and transformation returns to where it was in the US birth chart for July 4, 1776. The chart most popularly used for the birth of the US shows Pluto being in the second house of money and resources. Thus, this Pluto return harkens us to be alerted that transformation in our relationship money is very much "in the cards" for us. Personally, I remain very bullish about the foundational cryptos (Bitcoin and Ethereum). I am pleased to be part of this huge paradigm shift. If you are experienced with crypto. good for you -- keep on keeping on. If new to it, this is a good time to commit to learning and then acting. Staying informed and getting involved with crypto from my perspective is akin to being smart as is expressed in the adage: For greater ease in life -- ride the horse in the direction it is going. There is overwhelming evidence that our monetary system is going in the direction of crypto currencies.
